

5/10/2004

Publications of R.W. Rosenthal

Computation of equilibria of extensive games, (with K. Boudwin and R. Wilson), Tech. report #69-12, Operations Research Department, Stanford University, 1969.

Computing equilibrium behavioral strategies for n-person extensive games, (with K. Boudwin and R. Wilson), Working Paper #175, Graduate School of Business, Stanford University, 1970.

Stability analysis of cooperative games in effectiveness form, Ph.D. thesis, Tech report #70-11, Operations Research Dept., Stanford University, 1970.

External economies and cores, *J. Econ. Theory* 3 (1971), 182-188.

Review of Parthasarathy and Raghavan, Some topics in two-person games, *Siam Review* 14 (1972), 356-357.

Cooperative games in effectiveness form, *J. Econ. Theory* 5 (1972), 88-101.

Voting and economic externalities: a game-theoretic approach, Tech. report, presented at Econometric Society Meetings, Budapest, 1972.

The network equilibrium problem in integers, *Networks* 3 (1973), 53-59.

A class of games possessing pure-strategy Nash equilibria, *Int. J. Game Theory* 2 (1973), 65-67.

Taxation vs. prohibition of an external diseconomy by direct vote: a game-theoretic approach, *Int. Econ. Rev.* 14 (1973), 414-420.

Bayesian equilibria of finite two-person games with incomplete information, (with J.T. Howson, Jr.), *Management Science* 21 (1974), 313-315.

Disadvantageous syndicates, (with A. Postlewaite), *J. Econ. Theory* 9 (1974), 324-326.

Correlated equilibria in some classes of two-person games, *Int. J. Game Theory* 3 (1974), 119-128.

On Lindahl equilibria in economies with public goods, (with P. Champsaur), CORE Discussion Paper No. 7413, 1974.

Voting majority sizes, *Econometrica* 43 (1975), 293-299.

Induced outcomes in cooperative normal-form games, Discussion Paper No. 178, Center for Math. Studies, Northwestern University, 1975.

On cores in economics with public goods, (with P. Champsaur and D.J. Roberts), *Int. Econ. Rev.* 16 (1975), 751-764.

Market games with production and public commodities, Discussion Paper No. 156, Center for Math. Studies, Northwestern University, revised 1976.

An arbitration model for normal-form games, *Mathematics of Operations Research* 1 (1976), 82-88.

Lindahl's solution and values for a public-goods example, *J. Math. Econ.* 3 (1976), 37-42.

Discussion of Lloyd S. Shapley's 'noncooperative general exchange', in: S. Lin (Ed.), *Theory and Management of Economic Externalities*, Academic Press, New York, 1976, pp. 177-178.

Sufficient conditions for insensitivity in linear models, *Operations Research* 24 (1976), 183-188.

Core and value for a public-goods economy: an example, (with R. Aumann and R. Gardner), *J. Econ. Theory* 15 (1977), 363-365.

Arbitration of two-party disputes under ignorance, (with E. Kalai), *Int. J. Game Theory* 7 (1978), 65-72.

Arbitration of two-party disputes under uncertainty, *Rev. Econ. Stud.* 45 (1978), 595-604.

A model of cooperative games with binding commitments, in: P. Ordeshook (Ed.), *Game Theory and Political Science*, NYU Press, New York, 1978, pp. 97-111.

Sequences of games with varying opponents, *Econometrica* 47 (1979), 1353-1366.

A game-theoretic analysis of bargaining with reputations, (with H. Landau), *J. Mathematical Psychology* 20 (1979), 233-255.

Congestion tolls: equilibrium and optimality, *Naval Research Logistics Quarterly* 27 (1980), 231-232.

New equilibria for noncooperative two-person games, *J. Mathematical Sociology* 7 (1980), 15-26.

A model in which an increase in the number of sellers leads to a higher price, *Econometrica* 48 (1980), 1575-1579.

Repeated bargaining with opportunities for learning, (with H. Landau), *J. Mathematical Sociology* 8 (1981), 61-74.

Games of perfect information, predatory pricing and the chain-store paradox, *J. Econ. Theory* 25 (1981), 92-100. Reprinted in: A. Rubinstein (Ed.), *Game Theory in Economics*, Elgar Pub. Ltd., Brookfield, VT, 1990, pp. 298-306.

A note on exact purification, (with R. Radner), Working Paper, 1981.

A dynamic model of duopoly with customer loyalties, *J. Econ. Theory* 27 (1982), 69-76.

Private information and pure-strategy equilibria, (with R. Radner), *Mathematics of Operations Research* 7 (1982), 401-409.

A model of far-sighted electoral competition, *Math. Soc. Sci.* 2 (1982), 289-297.

A dynamic oligopoly game with lags in demand: more on the monotonicity of price in the number of sellers, *Int. Econ. Rev.* 23 (1982), 353-360.

Mixed-strategy equilibria in markets with asymmetric information, (with A. Weiss), Working Paper, 1982.

Approximate purification of mixed strategies, (with R. Aumann, et al.), *Mathematics of Operations Research* 8 (1983), 327-341.

Repeated two-player games with ruin, (with A. Rubinstein), *Int. J. Game Theory* 13 (1984), 155-177.

Strategic analysis of the competitive exercise of certain financial options, (with G.M. Constantinides), *J. Econ. Theory* 34 (1984), 128-138.

Discussion of: Anderson and Sundaresan, 'futures markets and monopoly', in: R. Anderson (Ed.), *The Industrial Organization of Futures Markets*, D.C. Heath and Co., Lexington, MA, 1984, pp. 107-108.

Mixed-strategy equilibrium in a market with asymmetric information, (with A. Weiss), *Rev. Econ. Stud.* 51 (1984), 333-342.

An approach to some noncooperative game situations with special attention to bargaining, in: A. Roth (Ed.), *Game-Theoretic Models of Bargaining*, Cambridge University Press, New York, 1985, pp. 63-72.

A dynamic screening example, Working Paper, 1985.

Dynamic duopoly with incomplete customer loyalties, *Int. Econ. Rev.* 27 (1986), 399-406.

Noncooperative games and nontransitive preferences, (with P. Fishburn), *Math. Soc. Sci.* 12 (1986), 1-7.

- A positive approach to noncooperative games, (with J. Friedman), *J. Econ. Behav. Organ.* 7 (1986), 235-251.
- Anonymous sequential games, (with B. Jovanovic), *J. Math. Econ.* 17 (1988), 77-87.
- Sovereign-debt renegotiations: a strategic analysis, (with R. Fernandez), Working Paper, 1988.
- Sovereign-debt renegotiations revisited, (with R. Fernandez), Working Paper, 1989.
- More on the 'anti-folk theorem', (with J. Masso), *J. Math. Econ.* 18 (1989), 281-290.
- A bounded-rationality approach to the study of noncooperative games, *Int. J. Game Theory* 18 (1989), 273-292.
- Duopoly with both ruin and entry, (with R. Spady), *Can. J. Econ.* 22 (1989), 834-851.
- Testing the Minimax hypothesis: a re-examination of O'Neill's game experiment, (with J. Brown), *Econometrica* 58 (1990), 1065-1081.
- A strategic altruism model in which Ricardian equivalence does not hold, (with L. Kotlikoff and A. Razin), *Econ. J.* 100 (1990), 1261-1268.
- Strategic models of sovereign-debt renegotiations, (with R. Fernandez), *Rev. Econ. Stud.* 57 (1990), 331-349.
- On the incentives associated with sovereign debt, *J. Int. Econ.* 30 (1991), 167-176.
- A note on robustness of equilibria with respect to commitment opportunities, *Games Econ. Behav.* 3 (1991), 237-243.
- The contractors' game, (with K. Lang), *RAND J. Econ.* 22 (1991), 329-338.
- A note on Abreu-Matsushima mechanisms, (with J. Glazer), *Econometrica* 60 (1992), 1435-1438.
- Some inefficiency implications of generational politics and exchange, (with L. Kotlikoff), *Econ. Politics* 5 (1993), 27-42.
- Suicide attempts and signalling games, *Math. Soc. Sci.* 26 (1993), 25-33.
- An explanation of inefficiency in markets and a justification for buy-and-hold strategies, (with R. Wang), *Can. J. Econ.* 26 (1993), 609-624.
- Rules of thumb in games, *J. Econ. Behav. Organ.* 22 (1993), 1-13.
- Bargaining rules of thumb, *J. Econ. Behav. Organ.* 22 (1993), 15-24.

- Price and quality cycles for experience goods, (with D. Gale), *RAND J. Econ.* 25 (1994), 590-607.
- Dynamic duopoly with slowly changing customer loyalties, (with Y. Chen), *Int. J. Ind. Organ.* 14 (1996), 269-296.
- Asking prices as commitment devices, (with Y. Chen), *Int. Econ. Rev.* 37 (1996), 129-155.
- On the use of ceiling-price commitments by monopolists, (with Y. Chen), *RAND J. Econ.* 27 (1996), 207-220.
- Simultaneous auctions with synergies, (with V. Krishna), *Games Econ. Behav.* 17 (1996), 1-31.
- Simultaneous auctions with synergies and common values, (with R. Wang), *Games Econ. Behav.* 17 (1996), 32-55.
- On some myths about sequenced common-value auctions, (with M.A. deFrutos), *Games Econ. Behav.* 23 (1998), 201-221.
- Multi-issue bargaining with perfect information, (with K. Lang), Working Paper, 1998.
- Experimentation, imitation, and stochastic stability, (with D. Gale), *J. Econ. Theory* 84 (1999), 1-40.
- Experimentation, imitation, and stochastic stability: addendum, (with D. Gale), *J. Econ. Theory*, 97 (2001), 164-174.
- Trust and social efficiencies, *Rev. Econ. Design*, 6 (2001), 413-428.
- Coordination through reputations: a laboratory experiment, (with D. Dale and J. Morgan), *Games Econ. Behav.*, 38 (2002) 52-88.
- Bargaining piecemeal or all at once?, (with K. Lang), *Econ. J.* 111 (2001), 526-540.
- Three-object two-bidder simultaneous auctions: chopsticks and tetrahedra, (with B. Szentes), *Games Econ. Behav.* 44 (2003), 114-133.
- Hide and seek in Arizona, (with J. Shachat and M. Walker), *International Journal of Game Theory*, forthcoming.
- Beyond chopsticks: symmetric equilibria in majority auction games, (with B. Szentes), *Games Econ. Behav.* 45 (2003), 278-295.
